Profile

Information Systems Engineering student with a strong interest in software development and building applications. Enjoys understanding how software works and solving problems with code. Experience with full-stack development, machine learning, and software projects through academic and personal work. Seeking an opportunity to gain professional experience and grow as a software engineer.

Education

Faculté des Sciences Semlalia (FSSM), Université Cadi Ayyad — Marrakech, Morocco
Licence in Information Systems Engineering — *Expected 2027*

Faculté des Sciences Semlalia (FSSM), Université Cadi Ayyad — Marrakech, Morocco
DEUG in Applied Computer Science (Informatique Appliquée) — *2026*

Baccalaureate in Physical Sciences – BIOF — Morocco
2023

Technical Skills

Languages: Java, JavaScript, Python, C++, C, SQL, HTML, CSS
Frameworks: Spring Boot, React, Spring Security, Spring Data JPA, Hibernate, Spring Cloud Gateway
Databases: Oracle, SQLite, MySQL, Redis
Tools & Platforms: Git, GitHub Actions, Docker, Docker Compose, Railway

Projects

With Me Shop | *React, Spring Boot, Spring Security, JPA/Hibernate, SQLite, Docker* — GitHub · Semester Project, 2026

- Developed a full-stack e-commerce platform with a microservices-based backend and role-based access control using Spring Security.
- Built the application using React, Spring Boot, Spring Data JPA/Hibernate, SQLite, Spring Cloud Gateway, and Redis.
- Containerized the application using Docker and Docker Compose and implemented CI/CD with GitHub Actions.
- Deployed the application on Railway with a production-accessible web interface.

Exam Room Management | *React, Spring Boot* — GitHub · Academic Project

- Developed a full-stack academic application using React and Spring Boot.
- Implemented the frontend and backend as separate application layers communicating through REST APIs.

ML Project | *Python, Machine Learning* — GitHub · Academic Project

- Developed a machine learning project using Python and applied both supervised and unsupervised learning techniques.
- Worked with data preprocessing, analysis, model training, and evaluation as part of the machine learning workflow.

2D Bike Game | *C++, SFML* — GitHub · Academic Project

- Developed a 2D bike game from scratch using C++ and the SFML multimedia library.
- Implemented the core game logic, player movement, game states, and interactive gameplay elements.

Certifications & Training

Machine Learning with Tree-Based Models in Python – DataCamp
Introduction to Data Science in Python – DataCamp
Data Manipulation with pandas – DataCamp
Cluster Analysis in Python – DataCamp
Data Structures and Algorithms in Python – DataCamp
Intermediate SQL – DataCamp
Intermediate GitHub Concepts – DataCamp

Languages

Arabic: Native • English: B2 • French: B1
